Chatbot lawyer overturns 160,000 parking tickets in London and New York

Free service DoNotPay helps appeal over $4m in parking fines in just 21 months, but is just the tip of the legal AI iceberg for its 19-year-old creator

Lawyers could be the next profession to be replaced by computers

Dan Mangan | @_DanMangan | Friday, 17 Feb 2017 | 1:55 PM ET

20K SHARES

Technology is often blamed for destroying traditional working-class jobs in sectors like manufacturing and retail.

But blue collar jobs aren't the only ones at risk.

The legal profession — tradition-bound and labor-heavy — is on the cusp of a transformation in which artificial-intelligence platforms dramatically affect how legal work gets done.

Those platforms will mine documents for evidence that will be useful in litigation, to review and create contracts, raise red flags within companies to identify potential fraud and other misconduct or do legal research and perform due diligence before corporate acquisitions.

sitions.

At JPMorgan Chase & Co., a learning machine is parsing financial deals that once kept legal teams busy for thousands of hours.

The program, called COIN, for Contract Intelligence, does the mind-numbing job of interpreting commercial-loan agreements that, until the project went online in June,
